

OptoFidelity

Icon Bechmarking Results

OptoFidelity Oy

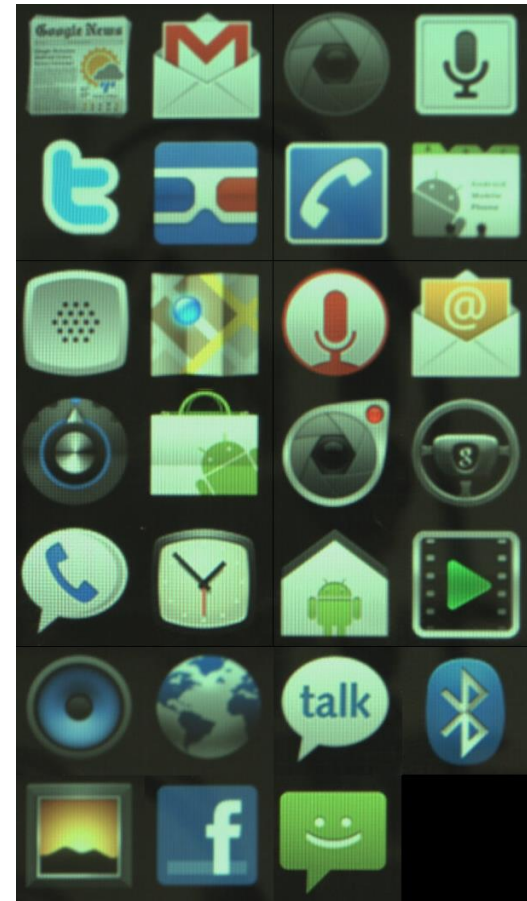

21.11.2013

Contents

- Following slides present the Icon detection performance benchmarking results
- These results are from **June 2013**
- There has been some development since that time
- New benchmark results shall be soon presented

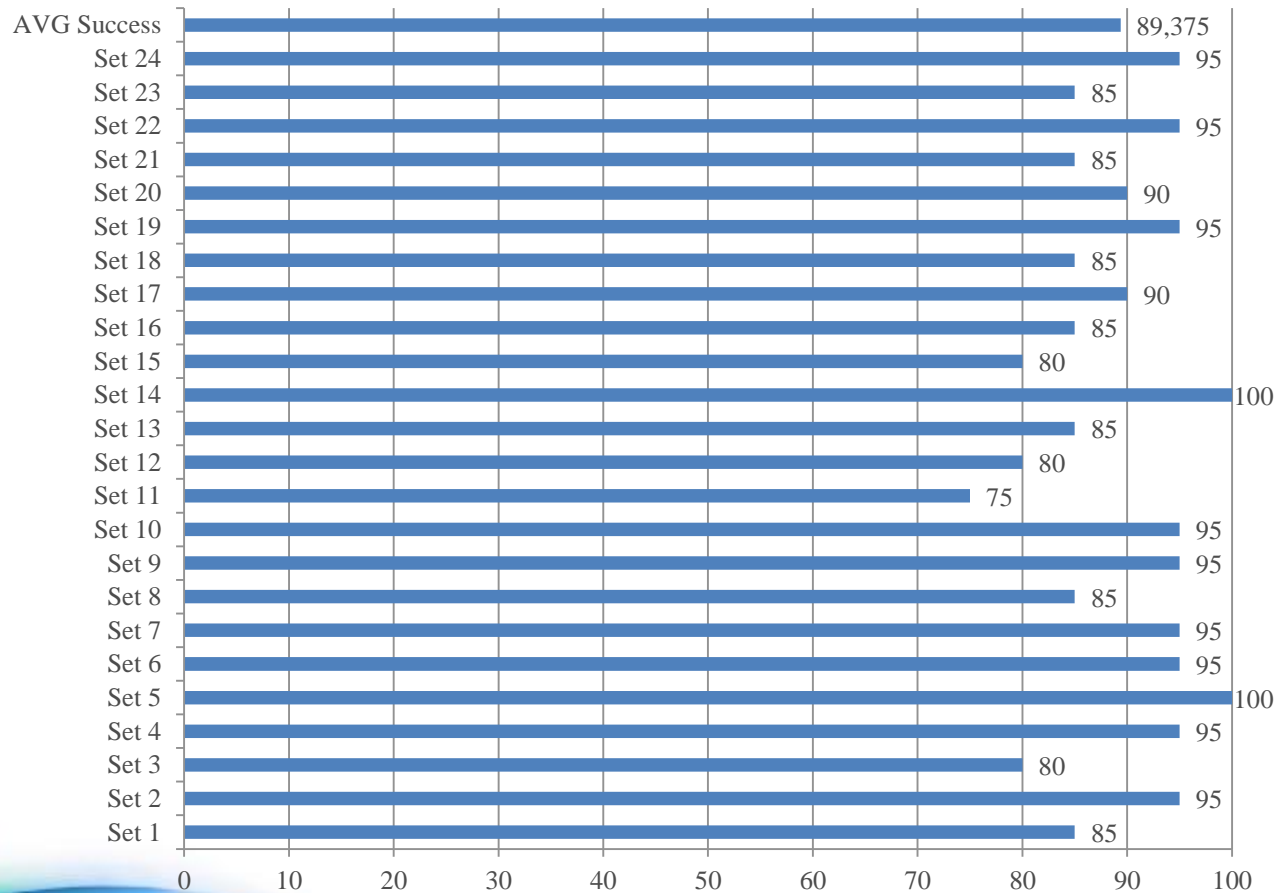

Benchmarking method

- Just like with OCR benchmarking, HTML pages were used
- Different kind of backgrounds were loaded to the web pages
- Random sets of icons per page were defined
- Total of 24 pages was tested

Icon detection performance

Success Ratio

Test material used in the benchmark

- Test material was a collection of web pages with random icons, and with different background colors / images
- Images were captured with a OptoFidelity Touch and Test robot, using Nokia Lumia 820 as a test device

Sample captures from test material
